WEATHER
ARMOR

PPF

WEATHER ARMOR™ is an innovative Paint Protection Film (PPF) that integrates the technology of AUTO-TRIZ- the world's leader in Nano technology and material science. Weather Armör incorporates the exclusive AUTOTRIZ® Organic Polysilazane Resins (OPSZ) and AUTO-TRIZ® Perhydropolysilazanes Resins (PHPS) technology which enkindled the establishment of the undeniably advanced anti-permeation nano technology. The cutting-edge OPSZ and PHPS nano technology embrace and enhance PPF properties, redefining the protection and confidence of surfaces it is applied on. It outperforms traditional PPF and provides promising durability and next-level performance.

Self Healing

Advanced self-healing layer renews film back to its original state that instantly repairs scratches and swirl marks with heat.

Chipping Resistance

Resist the impact of stones, gravel, and road debris from everyday road hazards with VERTEK.

Stain Resistance

Advanced self-healing layer renews film back to its original state that instantly repairs scratches and swirl marks with heat.

UV Resistance

Features with ultra-violet (UV) inhibitor to protect paint protection film and preserve paintwork against sun UV damage.

Chemical Resistance

Designed to protect vehicle's paintwork from damage caused by harsh chemicals, solvents and alcohol-based liquids.

Easy Cleaning

Stains and dirt can be washed away with ease.

WINDOW FILM

SOLAR

SOLAR ARMOR incorporates the proprietary Graphene GRX[®] technology from AUTOTRIZ- the world's leader in Nano technology and material science. The superior GRX[®] technology used in our window tints is not just seen, it is felt. From the top of line magnetron sputtered, multi-layer sputtered, nano-ceramic and carbon window tint options, there's a GRX[®] incorporated for every application. It outperforms other types of conventional tint to keep you comfortable and protected. All SOLAR ARMOR Window Tint is backed by manufacturer's warranty.
